

Discrete Mathematics
Volume 205, Numbers 1–3, 28 July 1999

Contents

Contributions

<i>A. Bonnecaze, P. Gaborit, M. Harada, M. Kitazume and P. Solé</i> Niemeier lattices and Type II codes over \mathbb{Z}_4	1
<i>G.J. Chang, L. Huang and X. Zhu</i> Circular chromatic numbers of Mycielski's graphs	23
<i>K.H. Chew</i> Total chromatic number of graphs of odd order and high degree	39
<i>Z.D. Dai, S.W. Golomb and G. Gong</i> Generating all linear orthomorphisms without repetition	47
<i>Y. Edel and J. Bierbrauer</i> Some codes related to BCH-codes of low dimension	57
<i>E. Flandrin, F. Tian, B. Wei and L. Zhang</i> Some properties of 3-domination-critical graphs	65
<i>K. Fritzsche and F.B. Holt</i> More polytopes meeting the conjectured Hirsch bound	77
<i>M. Grannell, T.S. Griggs and K.A.S. Quinn</i> Mendelsohn directed triple systems	85
<i>V. Guruswami</i> Enumerative aspects of certain subclasses of perfect graphs	97
<i>G.-N. Han and J. Zeng</i> q -Polynômes de Gandhi et statistique de Denert	119
<i>A. Kyriakoussis and M.G. Vamvakari</i> Asymptotic normality of the coefficients of polynomials related to the classical system orthogonal ones	145
<i>A.P. Pynko</i> Implicational classes of De Morgan lattices	171
<i>H. Wang</i> On the maximum number of independent cycles in a graph	183
<i>I.M. Wanless</i> Maximising the permanent and complementary permanent of (0,1)-matrices with constant line sum	191
Notes	
<i>M. Aigner</i> A Characterization of the bell numbers	207

<i>M. Blidia, P. Duchet, H. Jacob, F. Maffray and H. Meyniel</i>	
Some operations preserving the existence of kernels	211
<i>H. Enomoto, M.D. Plummer and A. Saito</i>	
Neighborhood unions and factor critical graphs	217
<i>A. Flammenkamp</i>	
Integers with a small number of minimal addition chains	221
<i>V. Gasharov</i>	
On Stanley's chromatic symmetric function and clawfree graphs	229
<i>P. Hersh</i>	
On exact n -step domination	235
<i>M.D. Hirschhorn</i>	
Basis partitions and Rogers-Ramanujan partitions	241
<i>T.A. McKee</i>	
A new characterization of strongly chordal graphs	245
Author index to volume 205	249
